

Current Status:

Awaiting nonprofit incorporation.

Current needs:

- Incorporation as tax-exempt nonprofit.
- Establishment of perpetual trust to maintain permanent websites.
- Develop sources of funding to support research.
- Executive Director
- Grant Writer
- Board of Directors

Mission Statement

1. Promote the practicality of digital immortality through example, creating perpetual websites preserving the thoughts, ideas, and writings of individuals on the Internet.
2. Research the digitizing of persons and the presentation of same on the Internet.
3. Examine the social and ethical implications of digital immortality through investigation, conferences, and public forums.

Why Digital Immortality?

Technology has transformed the possibility of the perpetuation of the soul into the practicality of Digital Immortality. No longer a question of when, Digital Immortality—driven by a technological manifest destiny powered by the very rich—is happening now. As a nonprofit funded by a perpetual trust, The Digital Immortality Institute aims to counter this trend by publicly raising ethical questions and providing permanent websites for worthy recipients *regardless of income*.

Other Issues

- Promote the modernization of current copyright laws to protect digital immortality.
- Advance the search for sustainable archival media.

Client Objectives

1. Preserve existing sites.
2. Select candidates for preservation.
3. Provide free sites to applicants chosen by a system combining merit and chance.
4. Provide sites paid for by approved applicants, wherein the wealthier clients help subsidize 1 through 3.
